HTML • CSS • SCSS/SASS • JavaScript • TypeScript • React • Redux • NextJS • Git • Figma

PROJECTS

Portfolio   May 2022
portfoliodamon.vercel.app
• Designed a portfolio showcasing technical projects using NextJS, React, SCSS
• Built and imported custom SVG paths using Figma before animating in SCSS to construct a captivating landing page
• Developed an interactive UI to navigate across the application utilizing GSAP animation library and the intersection observer
• Integrated EmailJS's API to establish communication on a static application without a hosted server

Stock Alerter   May 2022
stockalerter.vercel.app
• Designed an interactive UI for a finance-based web application using CSS, React, NextJS to monitor users targeted tickers
• Integrated authentication for WebSocket usage using MongoDB, NextJS's API Routes, and NextAuth
• Established alert thresholds for targeted stocks utilizing Finnhub's WebSocket to detect volatile price movements
• Incorporated visual progression of stock prices using Financial Modeling Prep's API through SSR and ChartJS
• Implemented news updates on searched stocks using incremental static regeneration and Market Aux's API

Pick a Bite   March 2022
pickabite.netlify.app
• Created a food-based web application to locate and select nearby food choices by implementing Google's Map API, Places API, and
  Geocoding API
• Developed an interactive UI using SCSS, React, SwiperJS, NextJS to ensure user satisfaction
• Incorporated user reviews, optimized location images, and ratings utilizing Google's Place Details

Blogsprite   Feb 2022
blogsprite.vercel.app
• Created palatable UX/UI design for a personal blog by utilizing JavaScript, CSS, and React
• Optimized SEO for numerous articles by utilizing NextJS
• Designed server-side code to render markdown files to the client side
